SUMMARY

Front-end focused developer with hands-on experience building responsive, animation-rich web interfaces using React, Tailwind CSS, GSAP, and Vite, alongside a strong foundation in C++, Python, Data Structures & Algorithms, OOP, and MySQL. Comfortable owning a UI end-to-end — from component architecture and state management to motion design and performance — and equally capable contributing to Python-based backend and automation tooling. Looking for an entry-level developer role to build reliable, user-friendly, cross-platform front-end products.

EDUCATION

Institute of Technology and Management — Gwalior, MP

B.Tech in CSE (IoT) | Aug 2023 – Present | CGPA: 6.31

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript (ES6+)
- **Front-End:** HTML5, CSS3, React.js, React Router, Tailwind CSS, GSAP, Responsive / Mobile-first UI, Vite, Bootstrap
- **Back-End / APIs:** REST API integration, FastAPI, MySQL, database design
- **Generative AI:** LangChain, embedding pipelines, AI agent design, prompt engineering
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- **Tools:** VS Code, Git/GitHub, npm, Postman, AWS (Cloud Foundations)

PROJECTS

Ember Studio — Interactive Agency Website | *React, Tailwind CSS, GSAP, Vite* | [Live Demo](#)

2025

- Architected the front-end component structure of a multi-page agency website, including routing, shared application state, and a reusable navigation system.
- Built a custom motion and interaction layer with GSAP, including a hand-built animated cursor component, to deliver a refined, production-grade user experience.
- Defined and implemented a cohesive visual design system on top of Tailwind CSS, balancing aesthetic polish with performance across devices.

AI Research Report Generator | *Python, LangChain, FastAPI* | [Live Demo](#)

2025

- Designed a multi-stage AI agent pipeline that researches a given topic and produces a structured, sourced report with automated quality review.
- Implemented prompt-engineered chains for report generation and critique, orchestrated through a single state-driven pipeline for reliability and maintainability.
- Structured the codebase into clear, modular components (agents, tools, pipeline) to support extensibility and future integration.

CERTIFICATIONS

- Zscaler Zero Trust Associate (ZTCA) Certification
- AWS Academy Graduate — Cloud Foundations
